## Design Philosophy

NATURE | ART | PEOPLE

Landscape design is an immersive experience with nature created through artistic expression and symbolism. We connect to the spirit of nature using elements of earth and sensory landscape methods.

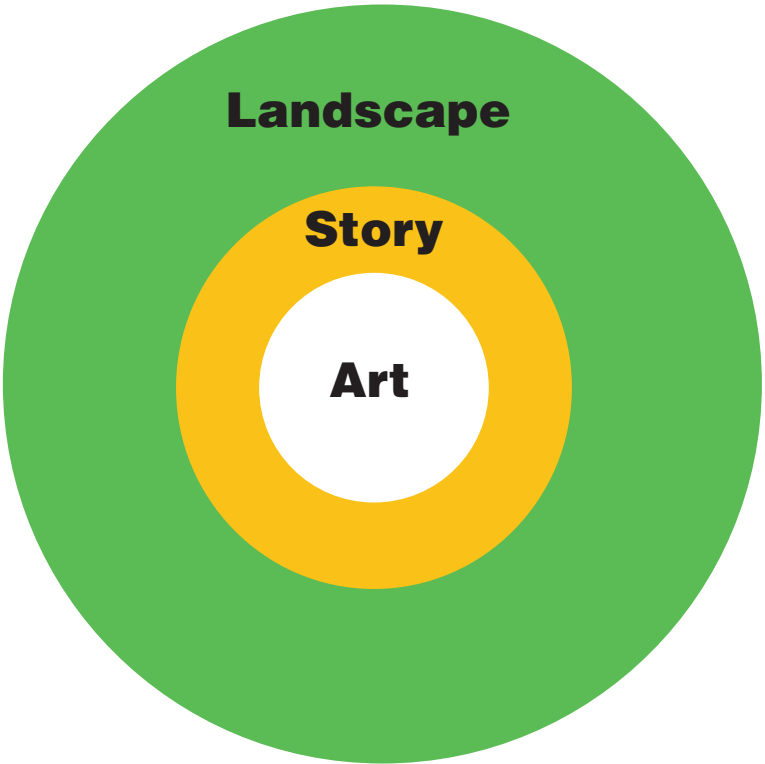

Nothing is art if it does not come from Nature - Antonio Gaudi

We bond with Nature through Art. Nature has inspired Art from the dawn of civilization, and humans used creative means to express the symbolic relationship between themselves and the surrounding environment.

The soul cannot thrive in the absence of art - Henry Moore

**STEP-01** Visualize the story and narrative for the garden

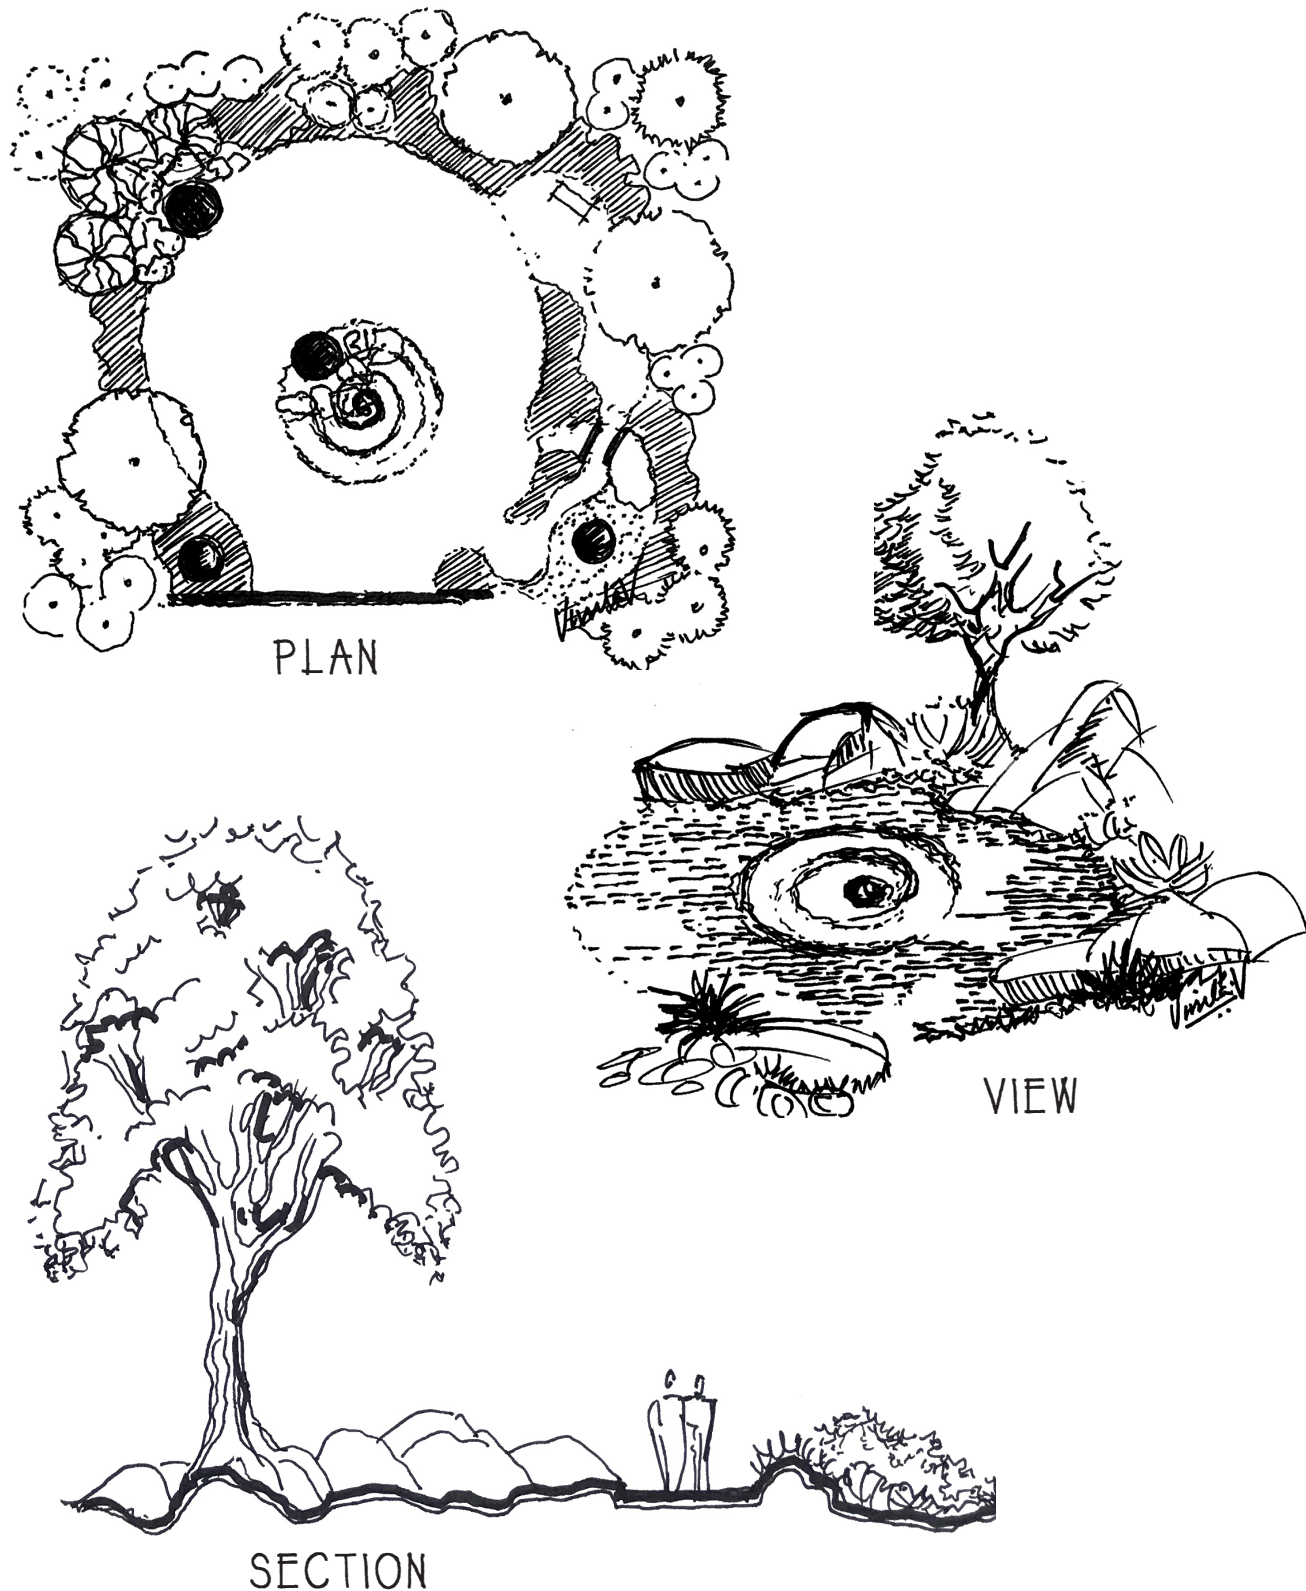

What makes you feel one with nature? Identify the elements that connect you to Nature such as artwork, symbol, color or plant as the core idea for landscape design. The energy that radiates from your core belief will radiate through the landscape.

(Select Art that you already have or choose from local artists that work on outdoor art installations.)

**STEP-02** Choose the sensory elements for the garden

Sensory Landscape Design considers all human senses when designing a space to offer a deeper understanding of our surroundings and our role within a given landscape. The primary five senses play a key role in designing intimate spaces in the garden.

- Sight** Choose the color palette for the garden (personal preference). Play of seasonal Light & Shadow based on sun angle.
- Sound** Choose medium for sound such stream, water feature, wind chime etc.
- Smell** Seasonal flowering plants with fragrance
- Taste** Growing edible fruits and vegetables
- Touch** Choosing textures and other tactile elements to touch, walk and play
